Special feature	force-fitting lifting of the vehicle

## Maximum safety, flexibility and efficiency when lifting EV's

Modern vehicle designs, especially in the field of electric mobility, present new challenges for workshops. The **MultiQuick adapter** from AUTOPSTENHOJ has been specially developed to meet these requirements and ensures maximum safety, flexibility and efficiency when lifting electric vehicles.

Thanks to the **double telescopic lifting pad**, the lifting height can be optimally adjusted to a wide range of battery-powered vehicles – even with different chassis shapes or in narrow spaces. The spring-loaded lifting plate makes it easy to position the vehicle precisely on the lifting points and ensures particularly fast and accurate positioning.

Whether for standard vehicles or modern electric cars, the **MultiQuick adapter is fully compatible with existing EV adapters and lifting height extensions and fits seamlessly into the existing range of accessories.**

**This keeps your workshop future-proof and flexible – with the high quality level you expect from AUTOPSTENHOJ.**

suitable for, among others	Maserati	Volkswagen	Tesla	BMW	Audi
